### ABOUT ME

Humble, hardworking and ambitious individual with a great passion for innovation and software development. Except back-end development, I am also committed to learning all the basics related to the ideal profile of a Front-End Developer, starting with HTML, CSS followed by JavaScript. I have knowledge on APIs, Functions, Objects, Arrays, etc. I have also practiced with frameworks related to java like Spring Boot. I prefer to use a practical approach to problem-solving and I'm focused to see things through to completion. I want to learn, and continuously improve my technical knowledge, as I am an individual who believes that everyday is an opportunity to learn and get better. I also consider myself as an articulate, confident and well-organized person.

### LANGUAGE SKILLS

**Mother tongue(s):** Albanian

**Other language(s):**

**English**

**LISTENING B2 READING B2 WRITING B2**

**SPOKEN PRODUCTION B2 SPOKEN INTERACTION B2**

*Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user*

### EDUCATION AND TRAINING

[ 2022 – Current ]

**Bachelor's Degree in Software Engineering**

**Epoka University** <https://epoka.edu.al/>

**City:** Tirana | **Country:** Albania |

**Java Full Stack Development Certification**

**Software Development Academy (SDA)** <https://sdacademy.al/>

**Software Development Course Certification**

**Tirana ICT Academy** <https://www.tiranaictacademy.al/>

**C Language Course**

**Tirana ICT Academy** <https://www.tiranaictacademy.al/>

### DIGITAL SKILLS

**My Digital Skills**

Python-Programming | JAVA Programming | C, C++ programming | PHP Programming | Haskell programming | SpringBoot Framework | Git | MYSQL | Html / CSS / JavaScript

## COMMUNICATION AND INTERPERSONAL SKILLS

---

### Communication

Excellent verbal and written communication skills.

### Teamwork

Proven ability to work effectively in a team environment.

### Problem-Solving

Strong analytical and creative problem-solving skills.

### Adaptability

Flexible and quick to learn new skills and technologies

## PROJECTS

### Coffe Shop - React.js & Spring Boot

Description: Built a full-stack web application for a coffee shop, where an admin can manage products, track sales, and view business insights. The platform provides a user-friendly interface for adding products, processing purchases, and analysing sales performance.

Key Features:

- Product Management: The admin can add, edit, and delete coffee products.
- Sales & Purchases: The system records transactions, allowing the admin to track revenue and expenses.
- Analytics & Reporting: View sales statistics yearly or for a custom date range (start & end date selection).
- Data Visualisation: Sales statistics are displayed in a simple graph for better insights.

### News website

A website about a program television where the news are published and also stuff like Tv shows and any categories the admin of the website wants to be seen by the users

Developed functions: Admin panel for content management,

Category creation and management,

News article publishing with rich text editor,

User registration and authentication system.

Used technologies: PHP, HTML, CSS, JavaScript, MySQL

Link: <https://github.com/Mikelmv18/Program-Television.git>

### Book-Store

Application about a book store management system in a user-level form, where different type of users have different permissions (Admin, Manager, Librarian).

Librarian can commit bills, Manager can add books to the stock and Admin can check how these two above have done their work and check statistics

Developed functions: Multi-level user access control (Admin, Manager, Librarian), Book inventory management system, Billing system for librarians, Statistical reports for administrative review, User-friendly interface with JavaFX

Used technologies: Java, JavaFx

**Link:** <https://github.com/Mikelmv18/Book-Store-Management>

### **Car-Rental**

Application where you rent your car from a list of cars by making reservations and also providing the time span with it. It also provides option to see the statistics of a certain car, the earnings and stuff like that

Developed functions: Car reservation system with date range selection, Car statistics and earnings report generation

Used technologies: Spring-Boot
